

Dayton Broadband Project Construction Has Begun!

The Port will not provide actual internet service. We are building the lines the private companies will use to provide service to your home.

- **Watch for Zero dB construction trucks in your neighborhood.**

- **Contact any of the three service providers, listed below, for pricing and to sign up for broadband service.**
- **Plans available for low income customers.**
- **You can change providers anytime without new lines or digging.**

Questions - Call the Port Office 509-382-2577
